It's impossible to develop a habit of eating boring foods. Over time, the urge cheat on your diet will be too strong and you'll wind up right back where you started. Miracle Noodle Gives You Great Taste... Without The Guilt

Food Shouldn't Be A "Guilty Pleasure"

Our products are made with the miracle of the Konjac plant, a staple of the Japanese diet for more than 1400 years. That means you can enjoy the satisfying recipes you love without the stuff that's not good for you.

My dad is a doctor, and when I was 8 years old, I started carrying his huge, black doctors' bag for him on home visits. There was magic in that bag! He made people smile. He made

cells? Aren't noodles one of the major foods responsible for your system has become more resistant to insulin over the years, making your cells reject the hormone? Aren't noodles high on

> The answer to both questions is "yes" but with one major exception. In Japan, a noodle made from a flour called 'Konjac' has been a dietary staple for 1,400 years. It contains zero net calories and zero net carbs and has a glycemic index score of zero, meaning it will not spike your blood sugar levels at all. That's why the name "Miracle Noodle" is not hyperbole. It's nothing short of miraculous that thousands of people have

I discovered them. And in 2006 I introduced this guilt-free Made from the Konjac plant, Miracle Noodles and Miracle Rice are 97% water and 3% soluble fiber – called glucomannan -- (plus a natural calcium additive to help the noodles keep Glad you asked! In fact, my Mother lost around 30 pounds avoiding white flour and using our products instead!** Miracle Noodles are 97% water. There's also 3% soluble vegetable fiber in the noodles. Together, the water and the fiber help you feel full — fast — even though the noodles have, at most, only a handful of calories per serving (many of our noodle and rice products are calorie-free!). If you eat Miracle Noodles or Miracle Rice for lunch and/or dinner once a day instead of regular high-calorie pasta and rice dishes, you'll slash, on the conservative side, at least 2800 calories per week! How's that possible? An average person eats about 400 calories worth of high-carb pasta or rice at one sitting (x7 = 2800). That's 11,200 calories per month! You can see how easy it is to lose weight just by eating something delicious once a day. Now imagine how much easier your weight loss will be eating Miracle Noodles and Miracle Rice for both lunch and dinner! P.S. They're also low carb! ** Individual results may vary. Yours may be even better! Yes! Please pardon us when we say they may just save the day!

That's because Miracle Noodles and Miracle Rice are low/no

your blood sugar balance, you must learn to master the Glycemic Index. That means regular pasta, noodles, and rice are a no-no on your approved diet list. At least that's what you may have been told by your doctor or nutritionist. Well, good news: you can have your cake and eat it, too. Ok, maybe not regular cake, but there's a substitute for several types of your favorite carbohydrates that you can enjoy guiltfree, everything from fettuccini to angel hair pasta to ziti to rice. "How can that be?" you might ask. After all, aren't these the type of carbohydrates that rapidly convert into sugar, forcing your pancreas to work overtime, releasing more insulin, the hormone that escorts sugar from the bloodstream into the
